

There is not much danger that presidential lightning will strike Morrison.

The husband of Mrs. May would not object to being the dark-horse if one must be had.

Mr. Morrison will be buried with his little bill, without much ceremony and very little sorrow.

Senate finance committee has said that the trade dollar must go to which there are no objections.

The more the members of the house talked on the tariff bill, the more certain was it that the tariff would be a killing effect on almost everything.

More news from Gramercy Park: Mr. Tilden is able to lift a pen, and will soon write a letter declining to become a presidential candidate. The old fox sniffs a republican victory which is in the air and doesn't want another defeat.

Mr. Orange Judd, the veteran editor of the American Agriculturist, has been elected to the Prairie Farmer of Chicago. The Prairie Farmer has, for some time been one of the best publications of its class in the United States, and with the experience and talents of Mr. Judd, it will no doubt improve still further.

The National Women's Christian Temperance union has fixed upon Tuesday, May 27th, as a day of prayer for politicians. This is an excellent movement. The politicians need the prayers of the righteous, and it is hoped they will avail much, but experience is against indulging in too much hope in this direction.

If one can read between the lines of public sentiment, it is that neither Blaine nor Arthur will be nominated. The two factions are inclined to be unyielding and this will kill both candidates. But the strongest man yet remains to be considered, and among them are General Sherman and Robert Lincoln—especially Sherman. If there is one man that will solidify the party, and make the people shout from the Atlantic to the Pacific, and from Minnesota to the Gulf, it is William T. Sherman.

The society for the encouragement of marriage which was organized in Cincinnati some five years ago, has devolved out of existence. It never was prosperous, and so far as can be learned, only three couples were married. The society gave a picnic some time ago, at which 5000 were present, and the three marriages then took place. Among them was William McHugh and Sophia Sorola. The marriages did not turn out well, the most unfortunate of them being that of McHugh who was hanged in Cincinnati last week for wife murder.

The Rockford water-works system has been in constant and successful operation for nine years, and during the past year they were more than self-sustaining. The receipts from water rents were \$11,438.49, while the running expenses were \$10,900. The works cost something near \$300,000, and so thoroughly beneficial have they been to the city, that the people of Rockford are unanimous in sounding their praise. The fire department has been nobly aided by the water-works system. There were thirty-three alarms during the year, and the total loss by fire was only nine hundred and eighty-five dollars! These are facts which the business men of Janesville should learn, and carefully ponder.

The Morrison horizontal tariff bill has met the enemy and has been killed. This tragic end was not unexpected. After days of weary debate, Mr. Converse of Ohio, moved to strike out the enacting clause, which was carried by a vote of 159 to 155. There was a good deal of intemperate talk on the bill during the discussion, but the judgment of the house at last settled down in sobriety, and the bill was killed. Mr. Randall of Pennsylvania, the democratic protectionist, made one of the strongest speeches in opposition to the bill. Business confusion and general bankruptcy would follow in the wake of the bill, and on behalf of the workingmen and the manufacturing interests of his state, and of all the states, he was emphatically opposed to the bill. It was guessed that the bill might reduce the surplus revenue, but there was no attempt for an adjustment of the tariff. It was like the bed of the old river; if a man was too long for it he was out down to it. A horizontal reduction offered no remedy, but was a palpable confession of inability to handle intricate problems at issue. It looked like agitation merely for the sake of agitation. There is something in what would have been the effect of the bill had it become a law. It would have unsettled prices, created general uncertainty in business circles, with depressing results in the labor of the country. Only three republicans voted for the bill, and these were from Minnesota. Forty-one democrats voted with the republicans to strike out the enacting clause. The defeat of the bill will settle the tariff question for the present.

When the members of the Deane county bar held a farewell meeting in the old court house on Monday evening last, there were several speeches made by old members of the bar. Among them, was one by Mr. E. W. Keyes. He gave some interesting reminiscences of the bar, and then turned to a more serious question—that of young lawyers getting puffed on the brain. He said it brought him deep regret that he had not given all his time to the law, instead of meddling with other matters. This is the feeling and the experience of almost nineteen out of every twenty who recklessly abandon a good law practice for a poor office. It doesn't pay to throw away a profession for all the honor and the small net income there are in the average office sought for by young law-

yers. The tenure of office is too uncertain to justify a young man to be tempted by its allurements. One can count hundreds of pretty good lawyers who made poor politicians of themselves just for the empty honor of holding an easy office. The uncertainty, the vexations, the waste of time, the attacks upon characters, the loss of manhood, and the general unhappy results attending office-seeking and office-holding, should teach young lawyers, as a rule, to keep out of the scramble for office. A young man, with an ordinary amount of brains, can win success in his profession if he only gives it his best efforts. Any other course will end in a failure.

Falling out of the hair may be prevented, brushy hair made soft, and the growth of the hair renewed, by the use of Ayer's Hair Vigor.

FOUR VOTES TOO MANY

For the Success of Morrison's Tariff Measure.

Horizontal Reduction Killed in the Place of Its Birth.

The Enacting Clause Stricken Out by a Vote of 159 to 155—Summary of the Debate—Analysis of the Votes.

WASHINGTON, May 7.—The scene in the house when it commenced business on the closing of the debate on Morrison's tariff bill was one of animation. The galleries were crowded with an eager and expectant audience and the floor well filled by members, many of whom had been out of the city and returned to be present on the occasion. Upon Randall's desk was a beautiful bouquet of flowers, placed there by some admirer of the Pennsylvania member.

The reading of the journal was hurried through with, and after a short time occupied by Brown, of Pennsylvania, Randall took the floor and proceeded to speak in opposition to the bill.

Randall took the floor in opposition to the bill. He opened by an allusion to the extreme quickness with which capital invested in large industrial establishments were quick to alarm, when, in common with all other interests, it was liable to be called on by taxation to aid in the support of the government, and Congress had proceeded to declare the policy outlined by the bill murderous and suicidal, and criticized severely the tone of the speaker in favor of the tariff.

Randall concluded by saying that the first act of Jefferson's administration was to remove the internal taxes made necessary by the war which had preceded. He said that the tariff was a tax on the people, and should be justified as war measures. If the tariff revenue system was abolished, there would be no surplus to carry them, and the government would be forced to increase taxes on the people.

Blackburn did not regret the wide range the discussion had taken. The bill simply proposed a reduction of tariff duties; yet every action on the tariff, from the foundation of the government, had passed in panoramic review. He then proceeded to consider the bill, and the reduction was to be made in the industries of the country would be ruined. He denied Randall's assertion that this was a step towards free trade. They were willing to give every dollar for the treasury that was due to the nation; but they wanted the collector's hand because the robber's hand. Protection was a barrier to trade; commerce could only be carried on by an exchange of commodities. It was not fair to carry out the tariff duties and then to receive their products because the home manufacturer must be protected. On such a basis there could be no commerce. He concluded with an earnest appeal to the members to vote to strike out the enacting clause, asserting that the man who voted to strike it out admitted to the country that he was afraid to meet the issue. He appealed to his colleagues to keep their promises to the people.

Kasson said the opponents of the bill did not object to a revision of the tariff; but did object to this sweeping reduction without regard to the necessities or the condition of the industry. They wanted the proposition to lay over until it could be carefully considered in the light of experience. He took issue with those who denied the constitutional right of protection, and insisted that there was authority under the clause to regulate commerce. He then went into an elaborate and forcible argument in support of the protective system.

At 3:20 p. m. Morrison took the floor for the closing speech. He said that, should the motion soon to be made prevail, it would cut off all possibility to amend the tariff laws, and would be a declaration on the part of the house that the tariff taxation was not too high. The question would go from this Congress to the people. He referred to the development of the great northwest, and said that in the discussion of the tariff, the commission had shown it was shown that protection was the basis of the building of railroads, and that everything entering into their construction and operation was much higher than if there were no protection of all of which we are now so proud.

DIED IN HIS BOOTS.

Charles Ford, the Missouri distinguished Citizen, Suicides.

Illness, the Optimist Habit and Impetuosity the Supposed Causes of the Deed—Some Personal History.

Brownsville, Mo., May 7.—In a handsome cottage, about a mile out of this city, the father's residence, Charles Ford, one of the slayers of Jesse James, now lies a corpse. He came here about a week since. Tuesday morning he ate his breakfast and appeared in good spirits. After walking around the grounds he went up stairs to his room. In a short time the family was startled by the report of a pistol, followed by a heavy blow on the floor. Rushing up stairs they found Ford lying on the bed, his coat off, with a small bullet-hole powder-burned, in his left breast just over the heart, from which the blood was slowly oozing. Dr. W. W. Mosby, who happened to be passing, was called in, and at once pronounced the wound fatal. Every effort was made to rouse the dying man, but it was impossible. In an hour after the shooting he ceased to breathe, blood flowing from his mouth and nostrils. He had been suffering from a painful illness. He was an habitual opium-eater and was about penniless, all of which facts doubtless combined to lead him to the deed. The pistol he used was an old one, rusty, and but little used, and it seems as if the idea of suicide must have been sudden, as he left no sign or indication that he had contemplated the step. Dr. J. O. Gant, the coroner, is still at the residence of the family, waiting for the body to be removed. He had been waiting for the body to be removed. He had been waiting for the body to be removed.

Bob Ford, who is in Kansas City, has been telegraphed to. But little, if any, sympathy is manifested by the people of this city.

Two years ago in April he aided in the shooting of Jesse James, and last month he forfeited his recognition by failing to appear at Plattburg on charge of robbing the bus at the Lexington ferry.

Ford was born in Virginia, but moved to this section at an early age, and was in his 20th year. He was actively engaged with the James gang for about six years, and was at the Blue Cut and other robberies. A number of rangers were afraid that he had been killed by Jim Cummings, or by some other member of the James gang, but there is absolutely no foundation for any such reports.

The death by suicide of Charles Ford removes one of the last survivors of the notorious Jesse James gang of desperadoes whose deeds of violence and lawlessness, extending over a period of about sixteen years, are without a parallel in the criminal history of the country. From the organization of this band of outlaws until its final dispersal by the assassination of Jesse James, in April, 1882, it numbered among its members, all told, no fewer than two score persons. Many of them have perished by violence, several are serving life sentences in prison, two or three died natural deaths, while the fate of several is wrapped in mystery.

The Methodist Conference, Philadelphia, May 7.—The Methodist conference did not pause by idleness for the day. Dr. Hattfield and Chaplain McCabe's remarks on the episcopal election were discussed with animation in private, but routine was the order of the public proceeding. The debate on Monday over Chaplain McCabe's resolution to proceed to the election of bishops has the effect of exciting even more than usual interest in the matter, and a number of new candidates for episcopal honors have sprung up. Among those more prominently mentioned are Rev. Dr. J. M. Waldrop, pastor of the Cincinnati board; the Rev. Dr. C. A. Fowler, missionary secretary, whose office is in New York; the Rev. Dr. W. S. Mills, president of the Garrett Biblical institute at Evanston, Ill.; the Rev. Dr. W. B. Mallard, presiding elder of the Boston district in the New England conference; the Rev. Dr. F. H. Vincent, secretary of the Sunday-school board; the Rev. Dr. W. H. Olin, presiding elder of the Birmingham, N. C., conference, and a prominent member of the New York legislature, and Rev. Dr. A. J. Kinneth, of this city, secretary of the Church Extension society. All of these are delegates to the conference. Four bishops will probably be chosen, though the fixing of the number with the conference. It is thought that the election for bishops will be fixed for some day next week.

The Swain Inquiry.—WASHINGTON, May 7.—The court of inquiry to investigate the charges preferred against Judge Advocate General Swain by A. E. Bateman, of this city, convened, and Mr. Bateman's counsel made a general statement of the grounds of the accusation. Counsel for Gen. Swain made a counter statement, asserting that the subject matter of the investigation would be shown to be groundless, with a reference of opinion between Bateman and Swain as to the state of their accounts in stocks, bonds, etc. Mr. Bateman was called to the stand and testified to the character and extent of the business transaction between his firm and Gen. Swain. Before the conclusion of his testimony the court adjourned for the day.

MISCELLANEOUS.—CHEMISTS HAVE ALWAYS FOUND DR. PRICE'S CREAM BAKING POWDER.

WASHINGTON, May 7.—Mr. J. H. Pratt presented to the senate the report of the committee on privileges and elections respecting the outrages in Copiah county, Mississippi. Mr. Sausbury said Mr. Jones and himself disagreed with the views of the majority, and would present a report at a future time. The report submitted to the senate is very long, and most of it is devoted to a discussion of the constitutional right of Congress to inquire into election offenses. It takes the ground that it is not only the right but the duty of Congress to do so. It predicts that the same condition will prevail in the elections of Copiah county this fall which existed at the time of the Matthews murder.

American Medical Association.—WASHINGTON, May 7.—The American Medical association convention has opened here. About 600 delegates are present, and now are expected. The proceedings opened with an address of welcome by Dr. Garret of this city, followed by the annual address of the president of the association, Dr. Austin Flint, of New York city. After the announcement of the meetings of the various state delegations the meeting adjourned for the day. At eight the members called upon the president.

Will Foretell Censure.—LONDON, May 7.—The Standard says the government will forestall a vote of censure by announcing that an expedition will be sent to Goua, Gordon's relief if the climate permits.

Griggs' Glycerine Salve.—The best on earth, can truly be said of Griggs' Glycerine Salve, which is sure cure for cuts, bruises, scalds, burns, wounds, and all other sores. Will positively cure piles, tetter, and all skin eruptions. Try this wonder healer. Satisfaction guaranteed or money refunded.
